

January 2006

Dear Parents of Junior Church Children,  
(Grades 4—6)

On Saturday, January 21 we will take our annual hike to the Science Museum of Minnesota.

Please meet at the church parking lot at 9:00 am and we will bring the surviving children home at the end of the day. If your child needs a ride TO church, please let us know when we call to confirm.

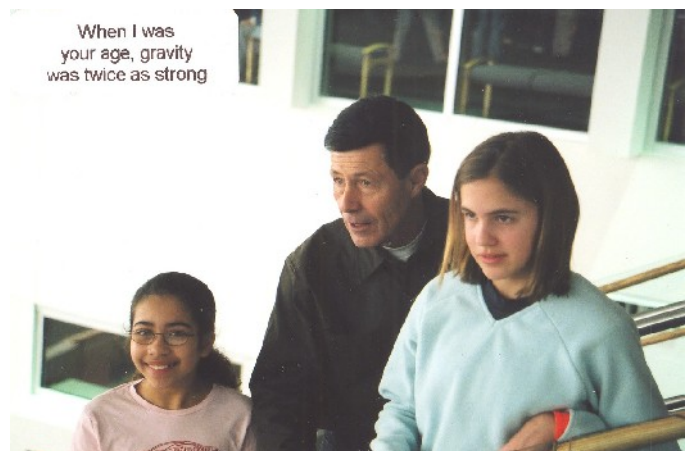

We view the exhibits, often using our baloney detectors to pick up signs of evolutionary propaganda. This is especially important since the level of fog being emitted lately on this subject by the organs of disinformation greatly exceeds that toxic to brain function.

This is a more expensive trip than our fall and spring hikes because we must not only buy tickets but also buy food at the in-house kiosks. If you have a family membership to the Science Museum, send the card and this will reduce the cost for your child to a measly \$2.50 and we will subsidize it down to no cost.

Otherwise, admission and the Omnitheater plus the 3D theater will cost about \$12.50 although we will subsidize it down to \$10.00

There will also need to be money for lunch and, perhaps, also snacks — how long CAN they go without food... we should do a study. It will probably come to about \$6.00 for a minimal lunch so \$10.00 total for food would not be out of the question for total of \$20.00 for the day.

We will call around to confirm who is coming.
